# Maria Curie-Skłodowska University

**Maria Curie-Skłodowska University (UMCS)** is a state higher education institution established in Lublin, in 1944. Lublin is a city located in eastern Poland and it is dwelled by 350.000 citizens. Over 100.000 students broaden their knowledge in Lublin. Our city is also a meeting point for various cultures, it is one of the oldest and most beautiful cities in Poland.

**The university offers education at undergraduate, graduate and doctoral programmes delivered at eleven faculties:**

- The Faculty of Biology and Biotechnology
- The Faculty of Earth Sciences and Spatial Management
- The Faculty of Mathematics, Physics and Computer Science
- The Faculty of Chemistry
- The Faculty of Law and Administration
- The Faculty of Humanities
- The Faculty of Economics
- The Faculty of Pedagogy and Psychology
- The Faculty of Philosophy and Sociology
- The Faculty of Political Science
- The Faculty of Arts

**UMCS** also runs Foreign Languages Teaching Centre, Academic Sports and Physical Education Centre and University Polish Language and Culture Centre for Foreigners, which offers a variety of tailor-made courses for foreigners who want to improve their language skills and broaden their knowledge on the history and culture of Poland. What distinguishes UMCS from other universities in Lublin is the fact that all campus facilities are located within one area in a close to the city centre.

**The university** also has its own Botanic Garden. Last year there were about 28 thousand students attending programmes at our University and we have already educated over 200 thousand graduates in total. About 4 thousand students were honoured with a doctorate degree and about 900 hundred candidates attained habilitation. The University owns several branches and affiliated colleges located in various towns of the region. All the above mentioned

facts make **UMCS** the largest university in eastern Poland. This higher education institution has established numerous relationships in order to develop further academic collaboration with other universities and colleges in the world. UMCS is also a member of various international academic bodies and a participant in **many programmes of academic cooperation**, for instance: 7th Framework Programme, the Lifelong Learning Programme: Erasmus, Comenius, Grundtvig, Leonardo da Vinci, Jean Monnet, the Baltic University Programme with European partners, and e.g. the Fulbright student and scholar exchange programme with US partners.

## Fields of study in English:

- **MSc in Chemistry**  
specialisation: materials chemistry

- **MA in Graphic Art Studies**

**Facts & figures:** Established in 1944 • 1800 academic staff • 24 000 students • about 470 foreign students

**Contact:** The Office of English Language Programmes: Pl. Marii Curie-Skłodowskiej 5, Room 313, 20-031 Lublin, Poland

### ■ degree

Master in Fine Arts

### ■ duration

2 years

### ■ language

English

### ■ ECTS points

120

### ■ description

Graphic Art Studies we offer are dedicated to undergraduates of all artistic faculties, for example Fine Art Media, Graphic Design, Art Education etc. It will be welcome serious interest in art printmaking as well as graphic design activity. The twenty-first century brings necessity to develop creative potentials in each area of knowledge, human intelligence and abilities. Our Studies are proposal of very interesting and gracious way to appreciate and learn principal, most important issues from fine arts and design. Advanced information from Fine Arts History, Contemporary Polish Art, Sociology of Art, Visual Arts And Literature can facilitate understanding of visual phenomenon and deepen the sensitivity to beauty as well as skills in creative solving of problems. Unit fine arts and theory will be a interesting offer to widen experiences in comprehending of understanding a plethora of phenomenon in contemporary art. Practical courses will base on study of classical graphic art, painting and drawing as well as the newest digital technologies and multimedia solutions. Our intention is to place emphasis on printmaking skills. Students will be lead to skills of three most important printing types: relief, intaglio, serigraphy and experimental techniques. The more practical and useful kind of plastic activity will be developed by graphic design as well as book illustration. It will be very inspiring to enrich the main study program with such additional proposals like photography and mosaic - ceramics. Our staff is gathered from the most experienced university teachers, recognized artists and scholars. The Institute of Fine Arts welcomes international students and values cultural diversity. All courses are conducted in English. We hope that our Graphic Art Studies will be very attractive and unique adventure and magical journey to World of Art. The table containing ECTS details can be found here and the detailed programme description can be found here.

### ■ description

The two-year master study programme is designed for graduates of the bachelor study programmes. Students are to expand their knowledge within chemistry and the chosen major/specialization. Graduates of the master studies should have basic theoretical knowledge and skills allowing them to solve problems involving chemistry as well as non-standard obstacles. They should also be able to give opinions on the basis of incomplete or limited information while observing legal and ethical principles. Moreover, graduates ought to debate about chemistry both with specialists as well as amateurs in this field and be able to be leaders of teamwork. Graduates ought to have skills enabling them to work in chemical industry and related areas, state and municipal administration and be prepared for working in education (after completing teaching specialty). Graduates should be ready to take up research challenges and start education on PhD studies. The table containing ECTS details can be found here
