Why Study at UJEP in Ústí nad Labem

A Glimpse at the History of our University

Facts and Figures

Why Study at UJEP in Ústí nad Labem?

Come and study at the university in Ústí nad Labem, named after the world famous scientist Jan Evangelista Purkyně. Link one phase of your life to the Czech Republic – the heart of Europe.

There comes a time in every individual's life when a serious decision about the future has to be made. You may be at that point if you:

- are going to complete your secondary education and are choosing the university to attend and/or are considering studying abroad,
- are already a university student and would like to spend one or two terms abroad,
- are already a university student and would like to gain several weeks of experience abroad,
- are a university professor and would like to travel abroad to teach for several days or weeks,
- are a university professor and would like to change your place of employment and travel abroad to work.

If so, read all of the following informational material about the J. E. Purkyně University (UJEP) carefully and when you have done so, decide whether this university has captured your interest and you wish to consider the options of studying in the Czech Republic. Every change in one's life is very difficult and making the decision to travel abroad is twice as hard. But be sure you will not regret making the decision to travel to Ústí nad Labem and to UJEP.

The university we invite you to visit is located in a North Bohemian industrial town, located in the beautiful valley of the river Elbe. This environment creates an excellent base for natural science as well as environmental and also economic fields of study. Equally, the varied history of the region and the abundant cultural and social opportunities create a good basis for the development of social sciences and arts.

UJEP is one of the chief agents supporting and influencing significantly the development of the whole region – from the economic, social and cultural aspects. By training young and professionally educated people, the university supports regional economic revitalization and development.

The existence of a strong university such as UJEP in the region has also motivated entrepreneurs to establish and develop new enterprises since those have a stable source of university- educated employees. And, of course, this is also linked to the fact that new companies provide new employment chances for graduates and drive young people to remain in the region. At the same time companies are a guaranteed potential support of their research and these companies in turn create a potential for the university to commercialize the results of its research and development.

You can expect to make a number of new friends in a pleasant university environment, which will offer cultural along with sports opportunities, as well as intellectual enhancement. You can also look forward to experiencing beautiful scenery and a lot of new-life and work opportunities. You will become a respective part of a large academic community and will be given the opportunity of not only being a simple consumer of data, but also demonstrating your abilities, who you are and whether you are capable of using the chances offered to the best possible extent.

Why Study at UJEP in Ústí nad Labem?

Before you make up your mind, we would like to suggest 10 crucial reasons for spending at least one stage of your life at J. E. Purkyně University in Ústí nad Labem:

1. A young, open, dynamically developing university.
2. A wide range of study programs and fields of study.
3. Strategic location – between Prague (the capital city of the Czech Republic) and Dresden (the capital city of Saxony, Germany).
4. Beautiful surrounding areas, a protected nature reserve, Porta Bohemica.
5. Interesting history of the region, a number of preserved historical monuments.
6. Excellent conditions for students interested in sports and/or arts.
7. Excellent cultural points of interest on both, the Czech and German, sides of the border.
8. Lower living expenses in comparison to other regions, quality accommodation with broadband Internet access.
9. A wide range of opportunities for acquiring a social grant.
10. The opportunity of acquiring paid residency and/or part-time employment.

We hope all those of you who decide to visit Ústí nad Labem briefly or for an extended period will enjoy returning to their Ústí Alma Mater.

The University in Ústí nad Labem bears the name of Jan Evangelista Purkyně (1787–1869), the famous Libochovice-born Czech, considered to be one of the most significant natural scientists and physicians.

Higher education in Ústí nad Labem has had almost 60 years of its tradition. In September 1954, the Pedagogic High School of Ústí nad Labem was founded as the first teacher training high school, and the

second high school in the Northern Bohemia region.

A government decree of September 1959 established a new Pedagogic Institute in place of the Pedagogic High School, of which the aim was to organize the complex education of elementary school teachers. Another decree of August 1962 removed pedagogic institutes from the authority of Regional People's Committees and related them directly to the Ministry of Education and Culture. This leap granted the highest level of independence and prestige to the Institute.

The significant development to follow was the establishment of the Pedagogic Faculty in 1964. Since that time the Pedagogic Faculty has become the only training institution in the region, training primary (and later also secondary) school-teachers. In 1977, there were significant changes in both the content and extent of activities. Under the new educational system – a unified five-year preparation course for middle-school teachers (5th–12th grade) was introduced, placing the Pedagogic Faculty on the level of other university faculties.

A Glimpse at the History of our University

A five-year course for 1st–5th grade elementary school teachers was also available. The new higher education legislation permits organization of state viva examinations at the faculty. Students graduating with the faculty's high school diploma could pass a state viva examination and acquire the degree of Doctor of Pedagogy (PaedDr.).

The political and social changes in the country after November 1989 have significantly affected the life of the Pedagogic Faculty. The Ústí nad Labem region was badly affected at the Communist times by mining and heavy industries, and was unattractive to professionals from other regions. On the contrary, due to bad environmental conditions, there was a heavy outflow of qualified workers. Under these circumstances, the faculty members and staff realized that teacher training should be incorporated into the wider framework of professional education, and as a result, Jan Evangelista Purkyně University in Ústí nad Labem was established according to the decree of the Czech National Council of 9 July 1991, which took effect on 28 September 1991.

The University consisted of three faculties (Faculty of Education, Faculty of Social & Economic Studies and Faculty of Environment) and two Institutes (Institute of Slavonic & German Studies and Institute of Roma Culture Studies) at the time of its foundation in 1991. In September 1993 the Institute of Artistic Culture was established: and was transformed into the Faculty of Art & Design in 2000. The Department of Technical Education of the Faculty of Education became the Institute of Production Technology & Management in autumn 1998. In 2003 the Institute of Health Studies was founded. Resulting from the transformation of the Faculty of Education, two new institutes (Institute of Science, later the Faculty of Science, and Institute of Humanities) loomed in 2005. In 2006 the Institute of Production Technology and Management was transformed into the Faculty of Production Technology and Management and the Institute of Humanities was transformed into the Faculty of Philosophy. The youngest University branch is the Faculty of Health Studies (2012).

**Units of J. E. Purkyně University
in Ústí nad Labem**

ECTS Information Package

Faculty of Art and Design (FUD)

The faculty was established in 1993, originally as an Institute of Arts. The turn-point in its career was the year 2000 when the institute was transformed into the Faculty of Art and Design. The concept of the faculty was originally based on the traditional art and crafts production, rooted in different local branches of glass, ceramic and fabric manufacturing of Usti region. Nowadays the FUD is considered one of the leading art and design schools in the Czech Republic.

During last 20 years the Faculty of Art and Design has won a reputation of expanding flexible school offering study programs in art, design, graphic design, photography and electronic media including master

program in Photography and Time Based Media in English and PhD program in Visual Communication open for international applicants. Faculty cooperates with galleries, schools and other international partners in EU and outside EU as well. Particular faculty departments co-work with local manufacturers and institutions in specific projects.

Since October 2008 the faculty has been situated in the newly rebuilt and top quality- equipped building on the territory of the UJEP campus in the centre of Ústí nad Labem. Here, one finds studios with up-to-date equipment, assembly halls, high-tech classrooms, a reading room, workshops and a computer centre.

Approximately 400 students from all Czech Republic and abroad have enrolled within the Bachelor, follow-up Master and Ph.D. study programs up to the present day.

Faculty of Education (PF)

The Faculty of Education has been the pedagogic, scientific and cultural centre of the region for 61 years.

It has also been the largest faculty of the university, with its 2360 internal and 1095 part-time students enrolled. Their professional education is provided by 9 academic departments, the Centre of Teaching Practice, the Centre of Foreign Languages, and the Life-long Education Centre.

Its mission is to provide quality higher education to the pre-school, primary, lower and upper secondary school teacher trainees, prospective special and social pedagogy professionals in undergraduate study programs and post-graduate study programs including master study programs. The faculty also provides PhD study in the fields of Czech studies, Music education, Visual arts education and Primary education. Habilitation and professorial procedures are provided in the fields of Music education and Visual arts education.

Education provided beyond the frame of teacher training and school education related environment is represented by Czech Language for Media and Public Sphere, Physical training and Sports and Popularization of music and organization of music life undergraduate courses and Sports and health postgraduate courses.

Apart from devoted and helpful academic and administrative staff, the faculty facilities are equipped with modern multimedia technology, which helps prepare prospective educators for work with the modern equipment at schools and elsewhere.

Quality as a major objective also applies to the activities of the faculty – Life-long Education Centre where numerous lifelong educational study programs and courses are offered mainly to teachers and other educators.

Faculty of Environment (FŽP)

The Faculty of Environment is one of the three original faculties founded back in 1991. The study programs have cross-sectional and interdisciplinary character and reflect contemporary environmental research issues. The mission of the faculty is to develop interdisciplinary education and research activities and to combine sustainable development focus with specialized study fields.

Research activities of the faculty are focused on the development of research teams in the branches of:

- 1) Landscape Restoration
- 2) Study of environmental disturbances caused by chemicals
- 3) Geography Information System application

Student and staff mobility is mainly realized within the Erasmus+ program. Ministry of Education of CR programs (e.g. the cooperation with Nha Trang University in Vietnam) and other exchange programs are used as well. The faculty cooperates closely with many European and Non-European institutions (e.g. Envirocentre in Glasgow, Scotland, Umweltzentrum Dresden, Germany) within internships, lecturing and research activities.

The faculty enrolls several hundreds of students each year, studying both in full-time and part-time study programs.

Faculty of Health Studies (FZS)

The Faculty of Health Studies UJEP is the youngest faculty of the University of JE Purkyně. It was established on 1st March, 2012, as a result of transforming the Institute of Health Studies UJEP and doc. MUDr. Miroslav Tichý was elected its first Dean. The establishment of the Institute of Health Studies in 2003 was the necessity driven by new special requirements on education appeared because of the membership of the Czech Republic in the EU and because of the demand from the side of regional health care settings. Tertiary education follows the concept of educational process in health care professional fields. It allows getting qualification in non-medical professional branches and carrying out professional activities related to health care services.

In the field of science and research, the faculty's departments are focused on the issues related to their specific fields of education, specifically theoretical, clinical, medical and nursing branches with the emphasis on Occupational therapy, Physiotherapy, Midwifery

and Nursing. The faculty has four accredited fields of study: Occupational therapy, Physiotherapy, Midwife and General nursing offered as full-time and part-time degree programs. To improve the qualification of academic staff and students, two laboratories were set up: a laboratory to study human motion and a laboratory to study of chronic diseases. The laboratories are implementing grant activities realized by academic team and cooperating with other research centers in the Czech Republic as well as abroad. Together with the regional hospital, the faculty established 8 clinics including Neurosurgery, Cardiology, Gynecology and Obstetrics settings. Clinical and practical trainings within accredited degree programs and related research and development activities are carried out there.

The faculty has more than 650 students.

Faculty of Philosophy (FF)

The Faculty of Philosophy was founded on September 1, 2006 as a result of the transformation of the Institute of Humanities, which then had been a part of the university since 2005. In the meantime, the Institute of Slavonic and Germanic Studies is represented on the faculty.

The main research and development activities of the faculty are focused on several important areas corresponding to their individual departments. The Department of History is traditionally aiming at history of Northern and North-Western Bohemia regions, history of the German nation on the Czech territory (this is carried out in cooperation with the Institute of Slavonic and German Studies). The Department

of Germanic Studies is focused at comparative methods in language and literature. Furthermore, the intercultural issues of Middle Europe and particularly in the Czech-German context have systematically been analysed here. Department of Political Science and Philosophy is particularly concerned with research on relations among the continental and analytical philosophy and structural phenomenology, the theory of democracy, political ideology, and relations between ethics and politics are among central issues of political philosophy research. The political science research is mainly concentrated on issues of the political theories and contemporary Czech and Political Party System.

The Faculty of Philosophy also either ensures or participates in teaching-focused study programs. The faculty enrolls more than 1 000 students.

Faculty of Production Technology and Management (FVTM)

The faculty was accredited in June 2006 and established by the rector on September 1, 2006. It has since become a successful continuation of The Institute of Production Technology and Management established in 1998. The target of the faculty is to prepare graduates for the industrial production sector and to service the production technology and management industry.

Faculty of Production Technology and Management provides educational activities in accredited degree programs and study fields corresponding with the structured studies starting from Bachelor degree followed by Master and Doctoral degrees. The faculty responds to societal demands of the region and aids to provide structured technically-oriented studies. Presently, around 900 students study at the faculty.

The annual International Congress of Precision Machining was started by the faculty. It was its main organizer with 9 European

countries participating in 2001. The faculty has experienced success in the form of a nationwide journal Manufacturing Technology, edited since 1996.

The Science and Technology Park Ústí nad Labem is a separate entity within the faculty which was established in 2010 on the basis of close and long-term cooperation with industry in research, development and life-long learning. The main mission of the STP is to realize scientific research oriented commercially, industrial application of research results, product innovation, business development and training with an emphasis on advanced technologies, materials and constructions.

Faculty of Science (PřF)

The Faculty of Science was founded on November 4, 2005. The Institut of Science, established on April 1, 2005, was a short-term forerunner of the faculty. On this date, Departments of Biology, Physics, Geography, Chemistry and Information Technologies became parts of this university branch. Later on October 1, 2005 the Department of Mathematics was founded within the Institute of Science.

The faculty offers wide range of attractive Bachelor, Master, and Doctoral degree study courses in natural and technical sciences. The mission of the Faculty of Science is to promote education and knowledge development in the sphere of science. Its aims are to strengthen UJEP research and development basis in the sphere of sciences, and to get more engaged into the European research community and international cooperation nets.

In the field of research and development, the faculty is primarily focused on plasma physics, plasmatic chemistry, nanotechnology and nanomaterials for environment

protection and biomedical applications, computer methods, biotechnology, microbiology and biology of plants and animals, applied geography, environmental geography and human-geographical aspects of landscape, virtual reality and 3D modeling organic chemistry, modelling, calculations in chemistry, instrumental methods of analytic chemistry, computer simulations and numerical analysis of compressible flows problems, radiobiological processes in living cells, and self-organizing mapping, function spaces and mapping, unassociative algebra and binary systems' theory.

Around 1200 students are studying at this faculty at the moment.

Faculty of Social and Economic Studies (FSE)

The Faculty of Social and Economic Studies is the only public faculty aimed simultaneously at both economics and social work studies in the Ústí region. It was established in 1991 and its main mission is to prepare qualified specialists for both, the public and private spheres.

Lectures take place in up-to-date classrooms equipped with all the necessary technical support. Several computer rooms and an internet café are at students' disposal in the faculty building itself. Apart from the tuition, the faculty also supports sports and other interest-based activities of our students (e. g. tennis or bowling tournaments).

Generally high standard of education is also maintained by the support of specialized workplaces. One of the significant workplaces is the City&Guilds accredited language qualification center created on the basis of the Department of Foreign Languages. It carries out its activities with the support of the British Council and the

Ministry of Education, Youth and Sports of the Czech Republic.

General information

The average cost of living for students in Ústí nad Labem is approximately 300 EUR (8,500 CZK) per month (including accommodation in the halls of residence, meals at a students' canteen and other costs). The expenses are higher at the start of studies (or the beginning of term) – as one should pay for a student card, city transport season card, library registration etc. (see below).

Catering Services

Catering for university students and employees of UJEP is provided by the canteen located in the Campus (Pasteurova 1, 400 96 Ústí nad Labem) and by "50 bar" located next to the Faculty of Education (České mládeže 8, 400 96 Ústí nad Labem). Further information to be found at: <http://skm.ujep.cz>.

Accommodation

At the present moment, the price of accommodation at the UJEP halls of residence does not exceed CZK 2,800 a month. The current price list is available at <http://skm.ujep.cz> → "Accommodation office".

Student card

Student card is issued in the form of a chip card, available in two versions:

- a) Without an ISIC licence: 100 CZK/year
- b) With an ISIC licence (full-time students only): 250 CZK/year

Erasmus+ program students are restricted to the choice of non-ISIC licence only. More at: <http://kas.ujep.cz/>

City transport

Student season ticket includes special fares for students under 26 and is available on providing a student chip card at the Dopravní podnik Ústí nad Labem (Ústí nad Labem) counter.

Student season ticket (for students under 26)

Library fee

Registration in the libraries of UJEP is free of charge. More at **<http://www.ujep.cz>** in "Podle činnosti" → "Knihovny".

The student registration fee at the Severočeská vědecká knihovna (North Bohemian Research Library), Ústí nad Labem is 100 CZK a year. More at **www.svkul.cz**.

1. UJEP units provide university education within the scope of study programs accredited by the CR Ministry of Education, Youth and Sports. Bachelor's study programs prevail within the fields of study on offer. Doctoral study programs are accredited at the Faculty of Philosophy, the Faculty of Art and Design, The Faculty of Production Technology and Management, the Education and Science Faculties. The UJEP Study and Examination Rules specify the conditions for studies in bachelor and master study programs.
2. Bachelor study programs are of standard duration between 3 and 4 years, they are practically focused and form the basis for potential subsequent studies in follow-up master programs. Graduates acquire a university diploma with the "Bc." degree.
3. Following master studies take 2 years, they enable improvement of theoretical knowledge and develop creativity. Graduates acquire a university diploma with the "Mgr." or "Ing." degrees – depending on the field of studies.
4. Doctoral study programs are of three years or four years in duration, they focus on scientific research and independent creative work. Graduates acquire a university diploma with the "Ph.D." degree.
5. The Academic year commences in the second half of September of the calendar year 2014 and ends in the first half of September 2015. The Academic year is divided into winter and summer semesters. Each semester includes teaching (usually 14 weeks) and examination periods (usually 5 weeks). The last semester of the bachelor and master programs is shortened (usually 10 weeks).
6. Studies take place in attendance and combined form, tuition usually takes place in the form of lectures, seminars and tutorials. Tutorials and seminars are usually obligatory classes. Combined studies are intended for employed students and take the form of several multiple-day education courses.

Studies at UJEP – Main Regulations

7. Foreign students are accepted for attendance studies only.
8. The basic unit of the study program is a subject of study. The study program classifies subjects according to their status as follows:
 - a) obligatory subjects - must be taken to graduate from the relevant study program,
 - b) compulsory-optional subjects - are part of the module from which a minimum number of subjects must be taken, or a minimum number of credits must be acquired to graduate from the relevant study program,
 - c) facultative subjects - are other subjects from the relevant study program and depend on the student's own choice.
9. UJEP uses the credit system based on the principles of the European Credit Transfer System (ECTS). The recommended annual study plan is of 60 credits proportionately divided among the subjects in the plan regarding the amount of study necessary for taking these subjects.
10. The credit tests and examinations students take and acquire credits for as registered in the given academic year, are a method of verifying the progress of one's studies. The subject may be registered twice during the study program (each registration allows a maximum of 3 attempts). A state bachelor's examination may only be applied for after 180 credits are acquired, application for the follow-up master program final examination is conditioned by the acquisition of 120 credits.
11. The allocated number of credits is not dependant on how well the student passes the relevant subject. How well the student does in the subject is expressed by classification of the examination:
 - a) excellent or 1 (grade A),
 - b) very good or 2 (grade B–C),
 - c) good or 3 (grade D–E),
 - d) failed or 4 (grade F).

12. Progress to the next year of studies is specified by the UJEP Study and Examination Rules. At entering the second year of study, the student is to have acquired the following:
 - a) in the field of arts on acquisition of at least 54 credits,
 - b) in the field of technical sciences on acquisition of at least 30 credits,
 - c) in other programs on acquisition of at least 45 credits.
13. One's studies are completed by passing the state bachelor's examination, including defense of the bachelor's dissertation; state final examination in follow master's studies, including defense of the diploma thesis; and state doctoral examination, including defense of the scientific work for doctoral programs. The graduate acquires a university diploma supplemented with a complete list of subjects taken, listed in the Diploma Supplement.
14. For all enrolled studying in study programs in the Czech language studies are free of charge (with the exception of fees for acceptance proceedings – approx. CZK 550). Studies in programs accredited in a foreign language (English, German) are subject to fee.

Academic year 2016/2017

Winter semester starts in the second half of September and ends in the first half of February.

Summer semester starts in the second half of February and ends at the end of June.

Our university is a diverse unity whose advantage is the variety of study programs, ranging from social-economic and nature up to technical sciences. The unique regional character of the university enables students of nearly all study programs to enjoy the advantages of combining theoretical knowledge and practice (cooperation with regional companies and institutions on implementing new technologies, carrying out economic analyses, performing environmental protection activities, providing social and pedagogic assistance, mapping and conserving cultural heritage, providing health care and physiotherapy services, creating modern design, etc.) This practical aspect also has an international character. The university widely participates in both EU (e.g. Erasmus, Comenius, Leonardo da Vinci) as well as national programs of development supported by the Ministry of Education, Youth and Sports and the Ministry of Foreign Affairs.

The ample dormitory capacity and one of the highest accommodation scholarships in the Czech Republic that the university grants, along with the wide variety of available free-time activity options (11 divisions of the University Slavia sport club, 5 choirs, etc.) make UJEP a modern and attractive place to study.

- Most study programs are accredited for daily and distance studies
- BSc undergraduates are awarded the degree of Bc.
- MSc graduates are awarded the degree of Ing./Mgr.
- PhD postgraduates are awarded the degree of Ph.D.

Notes:

1) Forms of Study: F – full-time, C – combined (part-time);

© – a field of study in which the faculty has acquired the authorization to perform state Viva examinations and grant the title of PhDr.

© – a field of study in which the faculty has acquired the authorization to perform state Viva examinations and grant the title of RNDr.

FACULTY OF ART AND DESIGN

2-year MSc Study Programs/Fields

Code	Study program	Code	Study fields	Form of Study	Form
N 8206	Fine Art	8206T047	Photography and Time-Based Media	F	English

The student of the following master's degree course of Photography and Time Based Media will undergo systematic and specialized training preparation for a career of an independent photographer, and will also experience the stimulating atmosphere of a students' community drawn from different cultural and language backgrounds. The high level of study is assured by the international experience of most of the team members who are knowledgeable lecturers (holding positions as visiting lecturers, with repeated foreign lecture activity, organisation of workshops, attendance at creative sessions and important exhibition activities) and also by their professional teaching of students within the developed and accredited, follow-master's course in photography in the Czech language.

The graduate of the course will be professionally equipped with systematic, structured knowledge and skills leading to a career as an independent artist, a creative executive of advertising and marketing agencies, graphical studios, or as a publisher. The student may also become a trustee of museums or galleries with photography collections and exhibition activities. The student of this branch will at the same time acquire the foundations of polemic-critical thinking, and will develop skills of perception, analysis and reflection of photography as an autonomous artistic discipline. The study concept will at the same time impart to the applicant's basic orientation in the Czech cultural environment, in the extended Central European visual culture framework and to acquire knowledge of the standing of photographic media within this context. A feature of the English variety of the photographic study is its major inter-disciplinarity and permeability, built on the coordinated cooperation of current studios (Photography, Applied and advertising photography and Interactive media).

3-year PhD Study Programs/Fields

Code	Study program	Code	Study fields	Form of Study	Form
P 7105	Historische Wissenschaft	7105V012	Tschechische Geschichte	F, C	German

A graduate of the doctoral study program in the field of Czech history (20th century History of the Czech Lands) will acquire good and reliable orientation in the field and excellent mapping within the respective specialization. The student will acquire an approach to manage the methodology and theory of historical science (including varied comparative aspects), will acquire an overview of the development of historiography and will be prepared for independent scientific work in the field of history. A graduate in this field should be

capable of executing and directing independent historical research, presenting results in the form of scientific publications and appearances in scientific conferences in CR and abroad. Graduates will be able to find employment in all institutions, which deal with historical subjects in the fields of Czech and Czechoslovak history, specific areas, in the field of Czech-German relations, in scientific institutions, archives, museums, the appropriate administrative institutes and more. Preparation for pedagogical activities also enables graduates of the doctoral study program to work as university lecturers and professors, either as employees of a university or as freelance co-workers, or workers with unemployment at a scientific workplace.

Program supervisor:**Doc. PhDr. Kristina Kaiserová, CSc.**

FACULTY OF SCIENCE

3-year BSc Study Programs/Fields

Code	Study program	Code	Study fields	Form of Study	Form
B1702	Applied Physics	1802R014	Applied Computer modeling	F	English

The aim of the study is to prepare graduates for utilizing computer technology during the resolving of more demanding technical tasks and applications in practice. This is also reflected in the emphasis on the basic preparation of students in the area of computer technology, mathematics and physics, which is necessary for acquiring the ability to understand and resolve more demanding model situations which they may encounter in practice. Graduates will be able to find jobs in industry and research.

2-year MSc Study Programs/Fields

Code	Study program	Code	Study fields	Form of Study	Form
N1702	Physics	1802T017	Computer Modelling in Science and Technology	F	English

The aim of the study is to prepare graduates for utilizing computer technology

during the resolving of demanding technical tasks and applications in practice. The students profile their knowledge by resolving demanding project situations in the areas of physics, chemistry, modeling of biophysical processes and the managing of processes of production work. Graduates will be able to find jobs in industry and in research within teams that ensure development and managing sections, and they have the background for scientific work in the area of computer or chemical physics.

4-year PhD Study Programs/Fields

Code	Study program	Code	Study fields	Form of Study	Form
P1703	Physics	1101V025	Computer Methods in Science and Technology	F, C	English
P1101	Mathematics	1802V020	General Problems of Mathematics	F, C	English
P3942	Nanotechnology	3942V003	Applied Nanotechnology	F, C	English

Computer Methods in Science and Technology

Each graduate will expand their knowledge in some mathematical discipline.

Study Programs and courses Taught in Foreign Languages and their Structure

Furthermore, they have the option to be involved either in the problem of school mathematics or further work in the area of mathematics itself.

If school teaching is the case, the graduate will be involved in school mathematics on a wider scope in such a way that they are able, in the respective area, to work in a creative manner at a department of mathematics at a university in preparation of future teachers, or to teach mathematics in a creative manner at secondary schools. The graduate will concentrate on the area of pedagogy and pedagogy psychology, in the doctrines of mathematics, school education politics, philosophy aspects of natural sciences along with education. Graduates would be able to resolve expert problems in theory and practice of education in mathematics, introduce new educational procedures and evaluate critically, create models of mathematical education or share in the development of theory of teaching mathematics as a scientific discipline.

In the latter case, the graduate's knowledge in mathematics or related disciplines is to be at such a level that the graduate can work in a creative manner in selected

field at a mathematics department at a university, academic or research institution.

Each graduate will be able to personalize their ability to plan independent creative activities, process projects, form the goals of such projects and find theoretical and experimental methods for their solutions, and will be able to work in international teams.

General Problems of Mathematics

The study has the aim of expanding the abilities of the graduate to understand, clearly formulate and resolve demanding situations through the help of computers. The graduate will mainly gain experience in mathematical-physical models, but it is possible to assert these methods in other related natural-science and technical fields. Graduates will mainly find work as scientists or university teachers in physics and in fields utilizing computer models during their description and study, but they may also find work in other areas of independent creative activities.

Nanotechnology

A doctoral study program Nanotechnology follows the master study program of

Nanotechnology. The doctoral program has multidisciplinary structure necessary for up-to-date research in nanotechnologies and material sciences generally. The topics have necessary overlaps to another science fields for broad education. The study of nanotechnologies, nanomaterials and their applications would provide students with deep background in topics related to the doctoral thesis. The study topics will be divided to the following groups:

1. Nanomaterial prepared by physical techniques
2. Nanomaterial prepared by chemical techniques
3. Bio nanotechnologies for bio sensing applications
4. Computer aided design of nanomaterial

A goal of the study is to prepare students with skills and knowledge in nano fields. The main interest will be on the techniques applicable in industry and not only in research laboratories as for example drugs, cosmetics, selfcleaning dyes, antibacterial products, biomedical materials, etc. The students should be well prepared for academic

research and industry research developing new nano featured materials. It will be supported by obligatory industrial training period during the doctoral study. Students will be encouraged to participate in management and marketing courses organized by the university. Experts from industry will hold short lectures for the students.

ONE-YEAR CZECH LANGUAGE COURSE

Term: October 2015 - May 2016

Exams: May 2016

The course is concluded with an official exam and the issue of the Certificate of Achievement (level A2-B1).

Visa information

A valid travel document (a passport) is needed to be enabled to enter the Czech Republic, accompanied by a visa, if required. For the details of student applications please contact the Czech Embassy in your state. We would like to stress the importance of arranging

Czech Language Course for Foreigners

"Visa – 90 days plus" to all our potential students at the Czech Embassy in their home country. Such a Visa cannot be arranged on the territory of the Czech Republic!

The application for the student visa must be presented along with the following:

- valid passport
- document verifying the purpose of staying in the Czech Republic
- document proving secured accommodation in the Czech Republic for the period of studying
- extract from police records provided by home country, or the country the applicant has lived in for the last three (3) years
- proof of sufficient financial means for the duration of stay in the Czech Republic
- two (2) passport-size photographs

The university will provide you with the following documents necessary for student visa application:

- document verifying the purpose of stay in the Czech Republic
- document proving secured accommodation in the Czech Republic for the period of study (only in case you would like to get accommodation in the University students' dormitory).

N. B.: For further details contact your Czech Republic Embassy.

Further information

After completion of the language and preparatory studies, foreign applicants take the university entry exams together with the local applicants. It may be useful to have an advanced estimation as to which fields they stand better chances of being admitted into. After Czech language course participants are encouraged to send out application(s) to selected university/faculty(ies) they wish to study at. The number of selected faculties is not restricted. All of the university entry exams are usually organized in the month of June.

For the entrance exam, together with the application, students must also provide an official proof of completed secondary education, with a Curriculum/Study Plan of subjects studied for the last four (4) years, and the Birth Certificate. All of these documents must be legally attested and translated into the Czech language. (The Czech translations can be arranged for during the one-year preparatory course.)

Study related documents

All foreign students wishing to embark on higher studies in the Czech Republic must obtain validation of their secondary education by the Czech Education Office. Documents required for this validation procedure:

Czech Language Course for Foreigners

- a) official proof of secondary/high school completion (High School Graduation Certificate, etc.)
- b) the Curriculum/Study Plan of subjects studied at secondary level each year with the number of lessons in each subject and, if possible, a certificate about the volume of practical lessons. If such documents do not exist, a written explanatory statement will be provided by the Czech diplomatic mission and enclosed with the applicant's dossier. All of these documents must be legally attested and translated into Czech language. All documents must be also verified by the Czech Foreign Ministry – or – the Official Notary Office in the country of origin and subsequently by the Czech Embassy there. Documents without official stamps shall not be recognized!

UJEP Participation in the Erasmus+ Program

One of the advantages of our university is the opportunity of UJEP students to study at contractual foreign universities one or two terms in the course of their studies, mainly with financial aid of the European Union. The most common form of studies is the Erasmus+ Program by means of which about 200 UJEP students annually study abroad. They can choose from more than 220 foreign universities from 26 European countries with which UJEP has inter-institutional agreements.

UJEP also sends students for working stays within the Erasmus+ Program. With the financial aid of the Erasmus+ Program, they can complete 2–12 months of training in firms, businesses and institutions within the EU.

Within the Erasmus+ Program, about 60 academic workers from European universities give lectures at UJEP and about 100 academics leave UJEP to lecture in contractual universities every year.

Ústí nad Labem City and the Ústí Region
Czech Republic / Basic Information

The university town of Ústí nad Labem is an industrial metropolis in North-west Bohemia, with nearly one hundred thousand inhabitants. It has assumed its strategic position on the Elbe River – the river route to Hamburg – since the 11th century. In the opposite – upstream – direction it represents a symbolic entrance gate to Bohemia (Porta Bohemica). The history of the city has historically been rather troubled since it is linked to a number of military conflicts, regularly interrupting its periods of development. One of the bloodiest of the conflicts was when the armies of Napoleon were beaten by the allied armies of Russia, Prussia and Austria in 1813. More than a century later, the town suffered its last wartime hardship in April 1945 in the form of an air raid by the American 8th air squadron. The second most tilted tower in Europe – the tower of the Church of the Ascension of the Virgin Mary, deviating from its axis by nearly two metres – remains a memory of the event.

The industrial history of the town was initially linked to silver and tin mining and processing, later to the development of fabric industry and subsequently to brown coal

mines and the development of chemical industry, the establishment of sugar refineries, breweries as well as alcohol distilleries, to the introduction of steam navigation and construction of the Masaryk locks and electricity generation plant under the Střekov castle.

Today, the regional town of Ústí nad Labem offers varied cultural and social opportunities (for instance the Municipal Theatre of Opera and Ballet, the Theatre Studio, the Culture Hall, the National Hall, the museum of the town of Ústí nad Labem, two natural cinemas, a number of galleries, the North Bohemian Science Library, The amunicipal spa, the zoological gardens the Větruše look out tower and restaurant). The advantage of this regional town with regard to sport activities and activities in nature, is its location in the Elbe valley between the Czech Central Mountains and the Ore Mountains. Its proximity to the Czech Switzerland National Park and the Elbe sandstone protected nature reserve make the town and the whole Ústí region attractive to tourists.

The hilly terrain of the region with abundant bodies of water provides ideal conditions for cycling, hiking (or possibly a combination of both), mountaineering, paragliding, water sports and winter skiing. There are also tennis courts, bowling halls, stadiums and sport halls in the town as well as riding schools and golf courses in the surrounding areas. See www.ustinad-labem.cz for

more detail. There are a number of nature sites near the town of Ústí nad Labem, some true European rarities. These include for instance the Vrkoč natural monument (a column such as a formation of basalt), the 12 metre high Vaňov waterfall (4 km from the city centre), Koží vrch (a craggy massif with abundant thermophilic vegetation).

The official currency in the Czech Republic is the Czech Crown – česká koruna (CZK). Exchange rates (January 4, 2016):

1 EUR = 27,020 CZK

1 USD = 24,794 CZK

The Czech Republic is divided into 14 regions with municipalities: Brno, České Budějovice, Hradec Králové, Jihlava, Karlovy Vary, Liberec, Olomouc, Ostrava, Pardubice, Plzeň, Praha, Ústí nad Labem and Zlín. It has a transitional climate between maritime and continental characterized by hot, showery summers and cold, snowy winters and generally changeable conditions. On a typical day in the Czech Republic between June and August the maximum temperature is between 15°C and 25°C.

Temperatures from December to February drop below freezing. Wide variations are common, with temperatures of +35°C in summer and –20°C in winter not being very unusual.

The Czech Republic can be rightly called the crossroads of European civilizations. It is situated approximately in the geographical centre of Europe and has an area of 78,866 sq. km. It is a landlocked country

Czech Republic/Basic Information

326 km from the Baltic and 822 km from Adriatic sea. It shares borders with Germany, Poland, Austria and Slovakia. The highest point of elevation is the peak of Mt. Sněžka (1,602 m above sea level) and the lowest point of elevation is near Hřensko where the River Labe leaves the Czech territory (117 m above sea level).

Some sites in the Czech Republic have been listed in UNESCO's World heritage Fund:

Praha, Kutná Hora, Český Krumlov, Telč, Lednice-Valtice area, Zelená Hora Church of St. John Nepomuk, Castle and gardens of Kroměříž, Holašovice, Litomyšl castle, Holy Trinity Column in Olomouc, Tugendhat Villa in Brno, The Jewish Quarter and St. Procopius' Basilica in Třebíč.

SOME HISTORICAL DATA

- End of the 5th and beginning of the 6th century – arrival of Slavs in the area of present-day Moravia and Slovakia.
- Second half of the 9th century – arrival of Christian missionaries.
- 1306 – a gradual strengthening of the Czech state during the reign of the Premyslid dynasty. 1346–1378 – the peak in prestige and power of the Kingdom of Bohemia during the reign of Charles IV.
- Beginning of the 15th century – a crisis of state leads to the Hussite movement.
- 1526 – the Habsburg dynasty succeeds to the throne of Bohemia – the formation of a multinational empire.
- 1620 – the defeat of the Bohemian Estates at the Battle of the White Mountain, continued centralization of the Habsburg Empire.
- 1918, October – foundation of an independent state of Czechs and Slovaks (Czechoslovakia).
- 1939, March – 1945, May – German occupation.
- 1948, February – Communist takeover.
- 1968, August – Soviet-led invasion of Czechoslovakia by Warsaw

- Pact countries brings an end to the "Prague Spring" and the Communist Party's attempt to build "Socialism with a human face."
- 1989, November – fall of the Communist regime.
- 1993, January – Czech Republic founded after the split of Czechoslovakia.
- 2004, May – Czech Republic becomes a member of the EU.
