We combine knowledge with practice

Over the past 16 years, WSEI has educated a several thousand of highly skilled professionals, who have found employment in different sectors of the labor market: in economy, administration, and education. Very often, these specialists occupy managerial positions, having a real impact on the functioning of their workplaces.

We did our best, to make sure that our university degree was a credible document for employers, confirming preparation for professional work. Our curricula were always created and implemented with the direct participation of practitioners – that is why these curricula are so unique. All field of studies, as well as specialties developed and taught at our University, are always being implemented with a view to the labor market, on which our graduates will start their professional life.

Thinking about scientific development, as well as about improvement of the quality of education of students, we have started a cooperation with many universities and research institution from different regions in Poland, as well as from different countries all over the Europe. We are now an important scientific center in Poland, conducting unique research aimed at improving the quality and productivity of different types of enterprises and institutions.

We are focused on passing on, to our students, our attitude on practical application of knowledge. We are also trying, to create for them the most comfortable conditions for comprehensive development.

Students of WSEI can always count on the support of our teachers and administrative staff. I know from my personal experience, that first year students can also receive help from senior colleagues, thanks to a well-developed system of students' self-help.

Currently, young people from abroad, are very large group of our students. I wish them all to be able to make use of all the skills, knowledge, and experiences gained during studies at WSEI, after they return to their home countries.

The symbol of the University of Economics and Innovation in Lublin is the picture of peaks, emerging one after another, which are defining new goals to be achieved. Therefore, we try to inspire our students to new challenges, to gain further peaks, and to perceive new perspectives and horizons from these peaks.

PROFESSOR
MIROSŁAW J. JAROSZ, MD, PhD
Rector of WSEI

We are University with a future

In the opinion of experts, University of Economics and Innovation in Lublin, is an elite and prestigious non-public university, constantly reinforcing its position on the academic map of Poland.

This is confirmed by numerous prizes, awards, and accreditations, which WSEI constantly receives. It is also confirmed by a high number of students, who each year choose our University. Also numerous scientific, organizational and teaching achievements, which are showcase of WSEI, distinguish the University from other universities, even the very large ones.

With a consistent concept of academic education, we prepare our students to work in attractive professions, and the co-operation with business allows us to respond to the challenges of the market, according to the needs of employers.

WSEI places emphasis on practical education, creates the professional skills of students, as well as competences and attitudes, which are desired on the labor market (creativity, innovation, intellectual independence).

In the years 2004-2016, 33 388 of graduates of first and second cycle studies have left the University. Currently, over 7 500 people are studying at the university. About 500 of them are foreign students.

The university is pursuing a number of activities and projects outside of teaching. In the period 2007-2016 WSEI has completed for more than 220 mln EUR.

The university has its own teaching facilities, with an area of over 12 000 m², which is constantly being upgraded and equipped with modern didactic equipment. In modern laboratories, research in the field of computer science, transport, mechanics and engineering, transport, public health, and experimental psychology are being conducted.

From 2014, WSEI possesses its own Dormitory, with modern apartments, fully equipped with furniture and kitchen appliances, in which 1 to 5 people can reside. In the Dormitory, there are also accommodations for academic teachers from WSEI.

Students of WSEI have the opportunity to pursue studies and placements abroad under the Erasmus+ program and the Scholarship and Training Fund. Cooperation with foreign universities is constantly expanded, so the educational offer is more attractive each year.

MA TERESA BOGACKA
The Chancellor of WSEI

STUDENTS' OPINIONS ABOUT THE UNIVERSITY

Why have I chosen WSEI?

... because it is a unique university, where you can meet students from all over the world. Such experience reinforces social integration and helps to learn foreign languages.

Lectures are conducted in an interesting way, in modern auditoriums with the use of multimedia equipment. If you like sports, you have a choice of many sports section. If you want to help – the door to volunteer are open to all. If you are you interested in working in scientific circles - you will receive support from the academic teachers.

Tetyana Falchuk, Economics, 3rd year, 1st cycle studies

I am a student from Ukraine, and it was not an easy choice: to study in Ukraine, or listen to my friends who are already studying in Poland and go to study in a foreign country.

I have chosen WSEI – interesting study programs, a large variety of fields of studies, a good base of the university. WSEI is a young university, created by the “OIC Poland”, and this is another advantage.

The hospitality and friendliness of the staff, the professionalism of teachers have made a great impression on me.

Andrzej Formaniuk, Economics, 3rd year, 1st cycle studies

WSEI helped me to get used to working in an international environment. During my studies, I went to Norway to study in Hogskolen and Bergen (Bergen University College). Half-year scholarship from the Norwegian Government (Norwegian Grants), have resulted in having more open look to international cooperation, a solid dose of intellectual challenges, and new acquaintances.

High level of the courses, as well as direct contact with lecturers in WSEI remind me of the best examples of Norwegian universities. Students can enjoy free access to licensed Microsoft systems and programs as part of MSDN, as well as to modern workshops and laboratories. I remember my third year of studying, as a solid dose of business practice - thanks to conducting lectures by practitioners, as well as meetings with representatives of the IT industry. Studying at WSEI was a great choice, studies fulfilled the hopes placed in them. Employers are open to us, they appreciate the practical approach and academic preparation.

Mariusz Jaroszek, Graduate from the 1st cycle studies
in Computer Science

I haven't had a big problem with a choice of university and degree course. I have immediately decided on the University of Economics and Innovation. I have heard about the University from my friends, who are studying here. They have told me, that they were very pleased with the academic staff and the general atmosphere at the University. I was not disappointed! Studies should give the joy of learning what interests us. Studies develop human being. You have to remember, that the person has to be primarily fulfilled. In the future, I want to start my own business. I am convinced, that with the knowledge gained in WSEI I could realize my dreams.

Emilia Pawelec, Economics, 3rd year, 1st cycle studies

ECONOMICS AND INNOVATIONS UNIVERSITY IN LUBLIN

University of the Year 2016

The Winner of the competition:
The Most Innovative
and Creative University
in Poland in Creating
Professional Perspectives

Leaders University 2016

RELIABLE UNIVERSITY

Good School – Good Job

Polish Innovation Award: The award is given to the most innovative and creative universities, research institutes, companies and institutions whose activities are characterized by innovation and care for the research and development sphere.

INTERNATIONAL EXCHANGE

University of Economics and Innovation conducts extensive cooperation with many universities and research institutions. Cooperation includes research and teaching activities, as well as cooperation in the field of European projects related to educa-

tion, entrepreneurship, assistance for students and graduates.

WSEI has actively participated in the Life Long Learning Program – Erasmus, Leonardo da Vinci, which were international student exchange programs. Currently, the University takes an active part in the implementation of ERASMUS + Program, which is an extension of the previous programs co-financed by the EU, including the Life Long Learning Program. WSEI also participates in exchange of students and staff under the Scholarship and Training Fund.

The school offers, to its own students, possibility of studying abroad (in partner universities), and accepts students from partner universities to carry out part of their studies. Students participating in the mobility programs retain student status and all rights connected with this status, including the rights to receive social and scientific scholarships of their alma maters. Successful completion of semester is done thanks to the ECTS (European Credit Transfer System). WSEI conducts also an exchange of academic staff, including inter alia visiting academic staff in universities abroad, during which employees from WSEI conduct classes for students of partner universities.

International Scientific
Conference „60 years
of analytic functions in Lublin”

Modern and practical studies in a strong research institution, are also the time to shape character and to develop passion of young people – students of WSEI.

STUDENTS' LIFE

Academic Choir of WSEI

WSEI helps its students in the liberation of entrepreneurial thinking, that will enable them to take care of their future. The University makes every effort, to help them succeed in the labor market. WSEI is the link, binding the students with the labor market.

Study visit to the National Security Office

In addition to the knowledge transmitted in the classroom, students of WSEI receive comprehensive support in preparation for entering the job market. Students participate in practices, which are being organized by the University in close cooperation with employers. Thanks to this, theoretical knowledge is supplemented, by learning of practical skills needed for a particular job.

FORM OF STUDY

Practical profile of studies

The advantage of the university, is a strong link between didactic activities and business practice. WSEI constantly rebuilds its programs and forms of education, adapting them to the needs of employers. Curricula are prepared together with the practitioners of economic and social life. These practitioners also conduct workshops for students. The university has signed a number of agreements with strategic partners, i.e. institutions and companies in which students can hold their practices, and in which practitioners to conduct classes with students are recruited.

Strategic Partners also participate in the education of students WSEI by organizing apprenticeships and internships for graduates. Students, three times throughout the course of education (after I, II and III year), held a 15-week paid internship/training (for students, who are not working) in the chosen company. Thanks to this, WSEI is able to practically prepare it's graduates to properly perform their work after graduation.

Modular organization of study

Instead of traditional subjects, WSEI has introduced modules, into its educational program. Modules are implemented through active forms of teaching, important in the process of building the competencies and skills. Modular studies allow to acquire competencies in many fields and use gained knowledge. Such studies, allow also to make contact with the employer, become familiar with market realities, and to shape the path of study in a flexible way. Each module consists of five components:

- 1. Lectures** – aimed at transfer and organization of necessary knowledge,
- 2. Classes** – aimed at learning how to use theoretical knowledge in practice,
- 3. E-learning** – allows Students to supplement and extend part of the course and solving tasks and tests anytime and anywhere with Internet access,
- 4. Workshops with the participation of employers** – allows Students to become familiar with the working environment. Classes carried out both in companies and in university,
- 5. Own work** – aimed at acquisition and perfection of the competences by the individual and group projects.

TERMS OF COMPLETION OF STUDIES

- participation in classes
- positive passing all exams
- preparation and defense of a thesis

OPINIONS OF STUDENTS ABOUT THE UNIVERSITY

A unique adventure of a lifetime! The opportunity to meet wonderful people from all over the world, learn about their cultures, languages, and customs. An opportunity to taste of life in another country in a new environment, far from home, family, and friends. Allows you to gain confidence, learn how to cope sometimes in difficult moments. Sometimes the desire to come back home, longing for an earlier life, but the atmosphere was so great that it was passing. During the stay, you can establish a long-term friendships and sometimes you meet the love of your life. In general, staying away can not be compared to anything! You just have to experience it!

Anna Głogowska, Graduate from WSEI

The trip to Norway in the framework of the ERASMUS Program

Polish currency is the zloty (1 PLN, zł = 0.23 EUR)

- apartment (from 130 EUR to 350 EUR)
- board (the cost of the basic shopping cart from 300 PLN to 650 PLN)
- commuting (monthly pass for urban services around 42 PLN) (30 days, discount, valid for all lines)

COSTS OF STUDYING IN LUBLIN

WSEI is the test center of The European Language Certificates – TELC. At WSEI, there is Foreign Languages Center, which offer the study of languages: English, Spanish, German and Polish, as well as intensive course of Polish language for foreigners during their first year of studies.

For students of the first year, adaptive trainings are organized, in order to prepare them for independent work and effective learning in the academic system. Also additional classes in mathematics are organized for these students.

Additionally, we offer free training to students with soft skills, e.g. create presentations, public speaking, teamwork. After these trainings each participant receives a certificate. Students have also the opportunity to receive certificates of: Cisco Academy, Oracle Academy, Microsoft Academy.

ADDITIONAL COURSES AND TRAINING

MEDICAL CARE AND INSURANCE

Students from the EU / EFTA countries may benefit from health care on the same basis as all insured in the NHF (NFZ). The proof of insurance coverage should be European Health Insurance Card. Card entitles students to free use of medical services in another EU / EFTA countries on the same basis as the insured in their country.

Students, who begin studying at universities in Poland, and are from outside the EU / EFTA countries may sign, with regional branch of NHF (NFZ), a contract for voluntary health insurance.

ACCOMMODATION

Students of University of Economic and Innovation in Lublin can take advantage of opportunities to rent a room in a dormitory, which belongs to WSEI. Dormitory is located just 4 kilometers from the University, at 3 Unicka Street. It is a modern building, opened in 2014. Dormitory is located in the center of Lublin and has a good connection with the University, as well as with the railway and bus stations. The building can accommodate approx. 300 people. There are 2-, 3-, and 4-bed rooms in the apartments, available for students. Each apartment has a kitchen or kitchenette and a bathroom. The building also has a canteen and laundry room. Costs ranged from 130 EUR/ per month (Triple room) to 350 EUR /per month (Apartament). Current prices can be found on the website of the University.

Current prices can be found on the website of the University.

The Dormitory of the
University of Economics and
Innovation in Lublinie

Another option is to hire a room or a flat somewhere in the city. The monthly rental fee is about 450 PLN to 650 PLN. In most cases, in such an accommodations, deposit is required. Deposit may be equal to the amount of three months' rent. The deposit is refundable, and normally is returned when given person is moving out (the accommodation must be left clean and undamaged).

Remember that a foreigner is required to check in at the place of temporary stay in Poland. It need to be done within 3 days from arrival to Poland.

DIDACTIC BASE

Students and staff of WSEI can benefit from comfortable learning and working conditions. The university has its own modern didactic base, with an area of 12 000 m². This base contains: 6 lecture halls, 5 large classrooms, 5 computer labs and 40 classrooms for classes and seminars. Classrooms are equipped with modern multimedia equipment. WSEI has also 17 modern teaching laboratories equipped with unique scientific and research, which can be used by staff and students of WSEI.

Residence of the
University of Economics
and Innovation in Lublin

At the disposal of students, there are two canteens, a convenience store with the copying machine, ATM, and a number of machines with food and drinks. They can use an internet cafe, as well as the separated areas where they can prepare for classes. In the whole building, there are computers with Internet access, free Wi-Fi is available from any point.

For students with disabilities, the elevators and platform for people in wheelchairs have been built.

Also a computerized library with a reading room equipped with a permanent connection to the Internet, has been built for students and staff of WSEI.

The book collection of WSEI has more than 55 000 copies of books from various fields of science. Readers of the WSEI Library can use the library collections of other libraries and on-line collections.

Students of WSEI can also actively relax and develop their sporting passions, using the gym and the sports hall of the area of 310.8 m² with an adjacent sanitary facilities. Motorists have an access to a secure car park.

WSEI's Dormitory was opened in October 2014. The building can accommodate approx. 300 people. There are 2-, 3-, and 4-bed, fully equipped and furnished rooms in the apartments, available for students.

On the ground floor of the building, there is a cafe with a reading room and places to learn. Residents of the Dormitory have access to a Wi-Fi network. Residents are also allowed to use the underground parking and laundry facilities

The building is supervised, monitored and secured round the

RECRUITMENT

clock. In the building, a smart key system is used – one key opens either cage door, the door to the apartment, and the door to the room. In order to prevent access of unauthorized people into the building, we have combined monitoring, surveillance and intercom into a coherent system of security. The building is monitored with usage of several cameras with digital recording.

In the premises on the ground floor of the building, service centers providing services to students and local residents are located.

The excellent location of the Dormitory allows its residents to use of public transport in efficient way.

Step 1 – Select the study program you are interested

(The list of offered degree programmes is available on the homepage, under the tab “Prospective Students”- study in English)
