EXECUTIVE EDUCATION

ESMT Executive Education delivers both executive development and company programs. In our company programs, we pursue an industry-focused approach and have created practice groups, each headed by an expert in the respective area. Together with our clients, they analyze a company's needs and design the learning content to achieve the given objectives. After the program, we continue to serve as trusted advisors and support an organization's further development with the business knowledge they need.

The programs focus on core business areas such as general management, strategy, sales, leadership, change management, finance, IT, decision making, and negotiations.

All ESMT programs are practice-oriented. This means that participants profit from the current state of research being applied in business today, research that can be implemented once participants return to their organizations. Furthermore, the programs provide both the participants and their organizations with fresh perspectives and a solid network of global contacts. In addition, each program is an opportunity to promote and retain valuable personnel.

ESMT Berlin offers the Postgraduate Diploma in Advanced Management and the Postgraduate Diploma in Management, university-level certificates awarded by ESMT to serve as a formal recognition of a participant's professional development.
